CORROSION 1980 INDEX

This complete index to the 12 issues of *Corrosion* published in 1980 includes the editorial and technical contents of each issue, an alphabetical subject index, and alphabetical author index. To locate information published during 1980, refer to the designated month and page number. Reprints of any article that has been published in *Corrosion* are available from NACE Headquarters, P. O. Box 218340, Houston, Texas 77218.

Corrosion Technical Contents Index, Volume 36, 1980

January

The Effect of Boiling on the Mass Transfer of Corrosion Products in High Temperature, High Pressure Water Circuits
F. D. Nicholson and
J. V. Sarbutt 1

Effect of Processing Variables on the Caustic Stress Corrosion Resistance of Inconel Alloy 600
G. P. Airey 9

Electrical-Potential Requirements for Cathodic Protection of Steel in Simulated Concrete Environments
J. B. Vrable and B. E. Wilde 18

The Effect of Impurity Segregation on the Hydrogen Embrittlement of a High Strength Nickel Base Alloy in H_2S Environments
B. J. Berkowitz and
R. D. Kane 24

Effect of Heat Treatment and Impurities on the Hydrogen Embrittlement of a Nickel Cobalt Base Alloy
R. D. Kane and
B. J. Berkowitz 29

Transgranular Stress Corrosion Cracking of Mild Steel in 0.5N H_2SO_4 + 0.005N KI Solution—Stress Corrosion Behavior Under Constant Crosshead Speed Test
Michinori Takano and
Nobuo Totsuka 36

Corrosion Rate Measurements on Steel in Sulfuric Acid Using a Microprocessor Controlled Potentiostat
Russel J. Taylor and
Lindsay F. G. Williams 41

On the Effects of α′ Martensite in Hydrogen Embrittlement of a Cathodically Charged AISI Type 304 Austenitic Stainless Steel
Hannu Hanninen and
Tero Hakarainen 47

February

Hydrogen Trapping in BCC Fe-Cr Alloys (7 ~ 9.4 Wt% Cr) as Studied by Microautoradiography—Contribution of Carbon-Hydrogen Interaction—Consequences on Hydrogen Cracking
C. Paes de Oliveira, M. Aucouturier,
and P. LaCombe 53

Straining Metal Electrode Technique as a SCC Test—Type 304 Stainless Steel in NaCl + H_2SO_4 Solutions
I. Maier and J. R. Galvele 60

Anomalous Corrosion of Austenitic Stainless Steel Exposed to Hydrogen at High Temperature and Pressure
Masayoshi Hasegawa and
Motoaki Osawa 67

Effect of Flow on Corrosion of Copper-Nickel Alloys in Aerated Sea Water and in Sulfide-Polluted Sea Water
Barry C. Syrett and
Sharon S. Wing 73

The Effect of Chloride Ion Concentration and Applied Potential on the SCC Behavior of Type 304 Stainless Steel in Deaerated High Temperature Water
P. L. Andresen and
D. J. Duquette 85

Characterization of Surface Films on an Anodically Polarized Ferritic Stainless Steel
Robert L. Chance and
Stephen W. Gaarenstroom 94

An Ultrasonic Abrasion Simulation Test Method Applied to Dental Alloy Evaluation
S. R. Wright, F. H. Cocks,
G. W. Pearsall, and L. Gettleman . 101

Technical Note: Predicting Extent of Sensitization During Continuous Cooling from TTS Diagram
R. K. Dayal and
J. B. Gnanamoorthy 104

March

Endurance Limit Enhancement of Notched, 1018 Steel in Sea Water—Specimen Size and Frequency Effects
W. H. Hartt and W. C. Hooper . . 107

Characterization of High Temperature Gaseous Environments
R. H. Kane 112

Scaling Behavior of an Fe-4.54 Wt% Cu Alloy in the Range 700 to 1000 C Under 1 Atm Oxygen
P. Nanni and F. Gesmundo . . . 119

Surface Composition of a Type 316 Stainless Steel Related to Initiation of Crevice Corrosion
G. Hultquist and C. Leygraf . . . 126

Pitting Resistance of Engineering Materials in Geothermal Brines—I. Low Salinity Brine
B. C. Syrett, D. D. Macdonald,
and H. Shih 130

Liquid Lithium Corrosion Rate Expressions for Type 304L Stainless Steel
D. L. Olson, G. N. Reser, and
D. K. Matlock 140

Ion Beam Analysis Investigation of Pit Nucleation on Titanium in Bromide Media
J. A. Petit, B. Kondro, and
F. Dabosi 145

Titanium Corrosion by a Hot Perfluoropolyether
Wayne L. Chandler, Lindsay B. Lloyd,
Michael M. Farrow,
Roger K. Burnham, and
Edward M. Eyring 152

Technical Note: A New Apparatus for Corrosion Study *In Situ* in High Temperature Water
Norihiko Fujita, Takaaki Tamura,
Masahiro Aoki, and
Hideo Minato 156

Technical Note: A Novel Electrode Design for Electrochemical Polarization Studies
Moavinul Islam 158

April

Temperature Rise in Underground Impressed Current Anodes
W. H. Burkhart 161

Simulation of Coal Conversion Reactor Environments
Richard A. Cooke and
Owen F. Devereux 167

Analysis of Errors in Using the Two Electrode and Three Electrode Polarization Resistance Methods in Measuring Corrosion Rates
M. J. Danielson 174

Effect of Anions and Organic Corrosion Inhibitors on the Rate of Hydrogen Penetration of Iron
Y. Saito and Ken Nobe 178

An Exploratory Study of Inhibition of Intergranular Stress Corrosion Cracking in Sensitized Type 304 Stainless Steel
C. S. O'Dell, B. F. Brown, and
R. T. Foley 183

Cathodic Alloying of the Surface of Titanium, Chromium, and Stainless Steels as a Method of Increasing Their Passivation and Corrosion Resistance
N. D. Tomashov, G. P. Chernova,
and T. A. Fedoseeva 201

New Inhibitors for Crack Arrestment in Corrosion Fatigue of High Strength Steels
V. S. Agarwala and
J. J. De Luccia 208

Technical Note: Effects of Manganese on

the Electrode or Free Corrosion Potentials of Aluminum
W. A. Anderson and
H. C. Stumpf 212

May

Intergranular Corrosion Resistance of a 26 Cr-1 Mo Ferritic Stainless Steel Containing Niobium
J. A. Davis, H. E. Deverell,
and T. J. Nichol 215
Capacity of Anodic Oxide Films on Bismuth in Various Solutions
S. Darwish, I. A. Ammar, and
M. Khalil 220
Analysis of the Stress Corrosion Fracture Surface of α-Brass
G. T. Burstein and
R. C. Newman 225
Corrosion Behavior of Metallic Materials in the Reducing Environments Characteristic of a Coal-Fired MHD Generator
R. N. Singh and K. Natesan . . . 230
Stress Corrosion Cracking of Al-Zn-Mg Alloy AA-7039
M. Landkof and L. Gal-or 241
A STEM Examination of the Localized Corrosion Behavior of a Duplex Stainless Steel
P. E. Manning, C. E. Lyman,
and D. J. Duquette 246
The Effects of Various Hydrogen Bearing Environments on the K_{Iscc} of AISI Type 4340 and 3.5% NiCrMoV Steels
Justin Opoku and
W. G. Clark, Jr. 251
Discussion: AC Induced Corrosion. The Effect of an Alternating Voltage on Electrodes Under Charge-Transfer Control
S. Venkatesh 259
Technical Note: Cu-Be Stress Corrosion Cracking in Ammonia
N. J. Magnani 260
Technical Note: Computer Modelling of Polarization Curves in Passive Systems
O. F. Devereux and K. Y. Kim . . 262
Corrosion Research at Materials Research Laboratories
Lindsay Williams 264

June

Determination of Surface Inhomogeneities Using a Scanning Probe Impedance Technique
H. S. Isaacs and M. W. Kendig . . 269
Influence of Moisture Exposure on the Composition of Oxides on Al-Zn-Mg Alloy: An Auger Electron Spectroscopy Study
R. K. Viswanadham, T. S. Sun,
and J. A. S. Green 275
Influence of Chloride Concentration on Stress Corrosion Cracking of Austenitic Stainless Steel in LiCl Solutions
R. L. Shamakian, A. R. Troiano,
and R. F. Hehemann 279
Nature of the Barrier Oxide Films Formed on Hafnium Electrode
M. S. El-Basiouny, A. M. El-Kot,
and M. M. Henfy 284
Some Mechanistic Observations on the Crack Growth Characteristics of Pressure Vessel and Piping Steels in PWR Environment
Warren H. Bamford and
David M. Moon 289
Stress Corrosion Cracking of Welded Type 304 and 304L Stainless Steel Under Cyclic Loading
J. N. Kass, W. L. Walker,
and A. J. Giannuzzi 299
Corrosion and Magnetite Growth on Carbon Steels in Water at 310 C — Effect of Dissolved Oxygen, pH, and EDTA Addition
H. S. Gadiyar
and N. S. D. Elayathu 306
The Role of Sulfide Inclusion Morphology in Pit Initiation of Several Type 300 Series Stainless Steels
P. E. Manning, D. J. Duquette,
and W. F. Savage 313
Technical Note: Mechanism of Corrosion of Iron by Hydrochloric Acid and Its Inhibition by Iodide and Quinoline
K. S. Rajagopalan and
G. Venkatachari 320

July

A Mechanistic Study of Sulfonium Salts Acting as Ferric Ion Corrosion Inhibitors
Wayne W. Frenier and
William J. Settineri 323
Determination of "True" Polarization Curves for Corrosion Rate Measurements of Steel in NaCl Stagnant Solutions
S. Wolynec and E. Escalante . . . 327
Differential Composition Profiles of Passive Films on Inconel 600 and Incoloy 800 Alloys
Masahiro Seo and Norio Sato . . 334
A Review of Proposed Mechanisms for Corrosion Inhibition and Passivation by Metallic Cations
Henry Leidheiser, Jr. 339
Characterization of Atmospheric Corrosion Products on Weathering Steels
Blanca R. de Meybaum
and Eduardo S. Ayllon 345
Effect of Alloy Element Additions on the Pitting Corrosion of Mild Steel
L. J. Gainer and G. R. Wallwork . 348
The Influence of Prior Deformation on Continuous Cooling Sensitization of Type 304 Stainless Steel
Harvey D. Solomon 356
Crevice Corrosion of Glassy Fe-Ni-Cr-P-B Alloys
Ronald B. Diegle 362
Influence of Hydrogen Chloride on Corrosion of Boiler Steels in Synthetic Flue Gas
P. Mayer and Angela V. Manolescu. .369
Investigation of the Kinetics and Mechanism of Subcritical Crack Growth by Delayed Failure of Titanium Alloys In and Out of Corrosive Environments
V. A. Marichev, I. L. Rosenfeld,
and V. V. Lunin 373
Technical Note: The Use of Load Pulsing in the Interpretation of Transgranular Stress Corrosion Fracture Surfaces in a Type 310S Stainless Steel
M. T. Hahn and E. N. Pugh . . . 380
Technical Note: A Method for Controlled Stress Corrosion Cracking in Nonsensitized Inconel 600 Tubing
R. A. Clark and R. L. Burr . . . 382

August

Corrosion Studies in Kraft White Liquor: Potentiostatic Polarization of Mild Steel in Caustic Solutions Containing Sulfur Species
D. A. Wensley and R. S. Charlton . 385
The Electrical Properties of Organic Coatings on a Local Scale—Relationship to Corrosion
John V. Standish and
Henry Leidheiser, Jr. 390
Influence of Strain During Cooling on the Sensitization of Type 304 Stainless Steel
H. D. Solomon and
D. C. Lord 395
Inhibition by Oleates of Various Amines in Temporary Protective Coatings on Mild Steel. Part 1 — Electrochemical and Electrical Investigations
T. Szauer, Z. Klenowicz, and
Z. Szklarska-Smialowska 400
Enhanced Corrosion Resistance of Laser Surface Melted Aluminum Bronze D (CDA-614)
C. W. Draper, R. E. Woods,
and L. S. Meyer 405
The Effects of Dissolved Oxygen, Chloride Ion and Applied Potential on the SCC Behavior of Type 304 Stainless Steel in 290 C Water
P. A. Andresen and
D. J. Duquette 409
The Effects of Bicarbonate on the Corrosion and Passivation of Iron
D. H. Davies and G. T. Burstein . . 416
Effect of Variations in Sea Water Upon the Corrosion of Aluminum
Stephen C. Dexter 423
A Study of Various Critical Pitting Potentials for Type 316 Stainless Steel in Sulfuric Acid Containing Chloride Ions
R. K. Dayal, N. Parvathavarthini,
and J. B. Gnanamoorthy 433
The Corrosion of Nb-Ni Alloys in a KOH Solution
K. Sugimoto, G. Belanger,
and D. L. Piron 437
Discussion: Hydrogen Embrittlement and Hydrogen Dislocation Interactions
W. R. Tyson 441
Technical Note: Corrosion Product Removal from Steel Fracture Surfaces for Metallographic Examination
I. Kayafas 443

September

Some Effects of Electrolyte Composition and Heat Treatment on the Aqueous Crevice Corrosion of Alloy 600 and Type 304 Stainless Steel at 288 C
Dale F. Taylor and
Michael Silverman 447
Effects of the Sea Water Carbon Dioxide System on the Corrosion of Aluminum
Helena T. Rowland and
Stephen C. Dexter 458
The Effect of Scan Rate on Pitting Potentials of High Performance Alloys in Acidic Chloride Solution
P. E. Manning 468

Mechanism of Stress Corrosion Cracking of Steels in H_2S
Wu-Yang Chu, Shi-Qun Li, Chi-Mei Haiao, and Juhug-Zuor Tien 475
Inhibition by Oleates of Various Amines in Temporary Protective Coatings on Mild Steel. Part 2 – Chemical Investigations
T. Szauer, Z. Klenowicz, and Z. Szklarska-Smialowska 482
Pit Formation in the Cathodic Polarization of Passive Iron – I. Dissolution of Passive Film and Pit Initiation
Kotaro Ogura and Noriyuki Takesue 487
Inhibition of Corrosion of Mild Steel in Sulfuric Acid by Thiourea and Derivatives
Michael B. Lawson 493
The Effects of Sulfur and Phosphorus on the Intergranular Corrosion of 304 Stainless Steel
C. L. Briant 497
Technical Note: A Practical "Reference" Electrode for Aqueous Phosphate Solutions Up to 300 C
H. Tischner, E. Wendler-Kalsch, and H. Kaesche 510
Technical Note: Aluminum Pitting Corrosion in Aqueous Glycol Solutions: Characteristics and Relevance to Solar Thermal Collector Systems
D. Wong and F. H. Cocks 513

October

Interaction of M-50 Steel with a Perfluoroalkylether Fluid and a 1% Additive Fluid Formulation
T. N. Wittberg, C. A. Svisco, and W. E. Moddeman 517
Preparation of Well Defined Colloidal Particles by Thermal Decomposition of Metal Chelates II. Cobalt and Nickel
Ronald S. Sapieszko and Egon Matijevic 522
Stress Corrosion Cracking of Austenitic Stainless Steel in an Acidified Chloride Solution
F. P. Vaccaro, R. F. Hehemann, and A. R. Troiano 530
The Role of Sulfide Inclusions in Hydrogen Entry During the Exposure of Steels to Acids
P. H. Pumphrey 537
The Effect of Hydrogen Evolution on Acidification in Alloy 600 and 304 Stainless Steel Crevices at 288 C
D. F. Taylor and M. Silverman . . 544
Passivity Breakdown of Mild Steel in Sea Water in the Presence of Sulfate Reducing Bacteria
R. C. Salvarezza and H. A. Videla . 550
The Corrosion Behavior of Niobium in Hydrochloric Acid Solutions
B. S. Covino, Jr., J. P. Carter, and S. D. Cramer 554
The Prediction of Stress Corrosion Cracking of Sensitized 304 Stainless Steel in 0.01M Na_2SO_4 at 97 C
F. P. Ford and M. Silverman . . . 558
The Effect of Prior Cold Work on the Degree of Sensitization in Type 304 Stainless Steel
S. Pednekar and S. Smialowska . . 565
Hydrogen Embrittlement of Amorphous Fe-Cr-Mo Alloys
A. Kawashima, K. Hashimoto, and T. Masumoto 577

November

The Use of Zinc to Control Aluminum Corrosion in Aqueous Glycol Solutions
David Wong and Franklin H. Cocks. .587
Anodic Polarization of Tin, Nickel, and a 65/35 Tin-Nickel Alloy in Alkaline Media Containing Halide Ions
M. S. Abdel Aal and A. H. Osman . 591
Effect of Loading Rate on Environmentally Controlled Cracking of Sensitized 304 Stainless Steel in High Purity Water
F. P. Ford and M. Silverman . . . 597
Stress Corrosion Cracking of Type 403 Stainless Steel in Na_2SO_4 at 100 C
B. Bavarian and Z. Szklarska-Smialowska 604
Corrosion Properties of Austenitic-Ferritic Duplex Steel AF 22 in Chloride and Sulfide Containing Environments
Guenter Herbsleb and Rolf K. Poepperling 611
Precursive Blistering in the Localized Corrosion of Aluminum
C. B. Bargeron and R. B. Givens . . 618
Some Observations on the Role of Inclusions in the Hydrogen Induced Blister Cracking of Linepipe Steels in Sulfide Environments
B. E. Wilde, C. D. Kim, and E. H. Phelps 625
Corrosion Fatigue of Type 304 Stainless Steel in H_2SO_4 and Boiling NaOH
Antwi Boateng, James A. Begley, and R. W. Staehle 633
Crack Growth Behavior of Type 304 Stainless Steel in Oxygenated 290 C Pure Water Under Low Frequency Cyclic Loading
Takashi Kawakubo, Mamoru Hishida, Kagetaka Amano, and Makoto Katsuta 638

December

Evaluation of Corrosion Rate of Copper Alloys by Means of Polarization Measurement
Yuichi Ishikawa and Kenzo Mikada 649
Stress Corrosion Cracking of Sensitized Type 304 Stainless Steel in Oxygenated Pure Water at Elevated Temperatures (Review)
S. Szklarska-Smialowska and G. Cragnolino 653
Chloride Ion Concentration and pH Dependence of the Transient Dissolution Characteristics of Metals During High Strain Corrosion Fatigue
C. Patel 665
The Chemical Nature of Aluminum Corrosion: IV. Some Anion Effects on SCC of AA 7075-T651
Anh H. Le, B. F. Brown, and R. T. Foley 673
Effect of Heat Treatment on Corrosion Behavior of Amorphous Fe-Cr-P-C and Fe-Ni-Cr-P-B Alloys in 1N HCl
M. Naka, K. Hashimoto, and T. Masumoto 679
Comparative Stress Corrosion Behavior of Welded Austenitic Stainless Steel Pipe in High Temperature High Purity Oxygenated Water
J. N. Kass, J. C. Lemaire, R. B. Davis, J. E. Alexander, and J. C. Danko 686
Technical Note: The Electrochemical Aspects and Stress Corrosion Cracking Behavior of Type 316 Stainless Steel in Chloride Containing Ammonium Sulfate Solutions
H. S. Tong and D. J. Swartz . . . 699
Technical Note: Towards a More Corrosion Resistant Galvanized Steel
Henry Leidheiser, Jr. and Ichiro Suzuki 701

A

Abrasion: scanning AC probe analysis of, 269
Abrasion: ultrasonic, dental alloy test, 101
Acetylene: steels, hi str. vs, 251

ACIDS
hydrochloric: 301 SCE in, 530
": 1-10N vs Nb, 554
": aerated vs amorphous Cr alloys, 679
": boiler tube steels vs, 369
": iron, attack mechanism vs, 320
": Pd on Ti vs, 201
inhibitors for Fe vs, 178
perchloric: 304 sensitized vs, 565
phosphoric: anodic films on Bi in, 220
sulfuric: 10N vs stressed 304, 633
": + chlorides vs 316, 433
": hafnium vs, 284
": Inconel Incoloy passivity in, 334
": Pd on Ti vs, 201
": + potassium iodide vs C steel, 36
": steel, C vs thiourea inhibition, 493

Active path attack: acids vs C steel, 36
Aeration: sea water CuNi vs, 73
water, 290 C vs 304, infl. of, 85
AF 22, 611
Alkalis: kraft white liquor vs C steel, 385
Alternating current: induced, attack by, 259

ALUMINUM AND ALLOYS
99.99, 5052: 3% NaCl, natural, synthetic sea water +C dioxide vs, 458
1100, 3003: ethylene glycol sol., Zn scavenging, 587
1100, 3003: ethylene glycol, 85 v/o sol., 130 C, vs, 513
5052: sea water 4-25 C vs, 423
7039: 3.5 NaCl SCC, 241
7075: stressed in chlorides, chemical reactions, 673
Al5.5Zn2.5Mg, infl heat treat, water on oxidation, 275
alloying effects in C steel, 348
Mo alloying effects, 212

AMMONIA
Al 7075 reduction from Na nitrate, 673
CuBe SCC in, 260
steels, hi str. vs, 251

AMMONIUM
benzoate: Bi vs, 220
borate: Bi vs, 220
sulfate: + chloride vs 316, 699

Amorphous alloys, 679
Anodes: see cathodic protection
Anodic protection: iron in carbonate sol., 416
Atmospheric effects: steel, weathering, analysis of, 345

ATOMIC EFFECTS
dislocations' interaction with H, 441
hydrogen binding, amine oleate inhibitors, 482
thiourea inhibitors vs acid attack on steel, 493

B

Biological effects: sulfate reducing bacteria vs C steel, 550

BLISTERS
Al vs chlorides, 618
pipeline steel hydrogen, infl on cracking, 625
Ti in bromides, 145

Brass, bronze castings, 649
Breakaway attack: CuNi vs sea water, 73
Brinkley gas characterization method, 112
Bromide sol.: Ti pitting in, 145

C

Calcareous deposits: infl on steel cracking, 107

CALCULATIONS
304 sensitized, SCC prediction, 558
coal conversion environment simulation, 167
Cu polarization vs field test rates, 649
environmental tests' statistical goals, 686
gases, hi temp., characterization, 112
impressed CP: temp. rise on anodes, 161
polarization curves, computer modeling, 262
polarization resistance meter errors, 175
potentiostat data anal. by computer, 41
SCC via load pulsing, 380
thiourea effectiveness vs sulfuric acid, 493
weight loss vs electrochemical, 41

Carbides: H trapping on C steel, 53
Carbides precipitation: AISI 304, 565

CARBON
304, infl on SCC in HPW, 299
CrNi steels: infl on SCC of welded, 686
dioxide: CuBe SCC in ammonia, infl of, 260
": geothermal brine content, 130
" + H(2)S vs Hast. C-276, 24
": salt waters containing vs Al, 458

Carp. 20Cb3, 130

CATHODIC PROTECTION
1036 steel: Ca hydrox. + NaCl, vs, 18
Al 7039 vs SCC in NaCl, 241
anodes: impressed current, temp. effects, 161
backfill consumption effects, 161
current density: steel, C vs CaOH(2). + NaCl, 18
steel cyclic stressed in sea water, infl., 107
Ti vs cracking in NaCl, 373
voltage: steel, C vs CaOH(2) + NaCl, 18
Zn in ethylene glycol vs Al, 587
Chelates: decomposition, 522
Chelates: hydrothermal aging sol., visual phenomena, 522

CHLORIDES
0-1000 ppm NaCl in 290 C water vs 304, 85
300 AISI series pitting in, 313
301 SCC in acidified, 530
304 sensitized vs, 183
304 SCC in hot HPW, infl, 409
304L Alloy 600, Pt crevices, infl of, 544
316 AISI: + ammonium sulfate vs, 699
acidic: 304 sensitization vs, effect of cold work, 565
": amorphous CrMoFe alloys vs, 577
": pitting tests, scan rate infl, 468
alkaline: Tin, Ni, Tin-Ni vs, 591
Al 7075 SCC, infl of concentration, 673
concentration, pH effects on corrosion fatigue, 665
steels CrNi duplex vs, 611

Chromium: alloying effects in C steel, 348
Chromium +Pd electrolytic coating, 201

CHROMIUM-NICKEL ALLOYS
Carp. 20Cb3: geothermal brine vs, 130
Hast. C-276 vs C dioxide, H(2)S, 24
Hast. C-276: geothermal brine vs, 130
Hast. G vs geothermal brine, 130
Haynes Alloy 20: geothermal brine vs, 130
Inconel 600: 288 C water crevice attack, 447
" ": 315 C, 10% NaOH vs, 9
" ": crevice attack, infl of H, 544
Inconel 625: geothermal brine vs, 130
Inconels: coal combustion gas vs, 230
passive films in sulfuric acid, composition, 334
pitting in chlorides, scan rate test infl., 468
SCC controlled test technique, 382

Coal: see energy sources

COATINGS, METAL
application: electrospark, 201
application: electroplate diffusion of metals, 201
CrNi vs coal combustion gas, 230
Zn on steel vs NaCl, 701

COATINGS, ORGANIC
epoxy-polamide: electrical scanning in KF, 390
grease and wax + or - inhibitors, 400, 482
scanning probe impedance of, 269

Coatings, refractory chrome base vs coal combustion gas, 230
Coatings, temporary, 400, 482
Cobalt & alloys: chelate preparation, 522
Colloidal chelate preparation, 522

COPPER AND ALLOYS
CDA 614, Al bronze D, surface melting by laser, 405

INCORRECT VOLUME NUMBER
SHOULD READ VOLUME 36

THIN BOLLIX

70:30 Zn: sea water vs, 73
90:10 Zn: sea water vs, 73
CuBe vs ammonia, 260
iron vs 1000 C oxygen, infl of alloying with, 119
polarization rates compared to field test, 649
Corrosion products: BWR mass transfer, 1
Corrosion rates: CuNi vs flowing sea water, 73

CRACKS AND CRACKING
A533B, A508, other steels in PWR env., 289
301 critical potentials in acidified chlorides, 530
304 cyclic loading vs 290 C HPW, 638
" sensitized in HPW, 597
" sulfuric acid, cyclic loads vs, 633
CrNi duplex steels in chlorides +H(2)S, 611
notch effects in steel vs cracking, 107
steel, infl Mn sulfide inclusions on, 537, 625
steel in sea water, infl geometry, CP, 107
titanium alloys, mechanism, of delayed, 373

Creep: Al SCC, infl, 241
Crevices: see localized attack
Croloy, 230

D – E

Data Correlation: graphical, coatings' electrical resistance, 390
Dealloying: see localized attack
Deformation: see fabrication cold work
Dislocations: H interaction with, 441
Duplex steels, 611
E-Brite 130, 215
Electrodes: polarization resistance meter, 2 and 3 factors, 175
Electrodes: polarization test, 158
Electrolytes: coal conversion simulation, 167
Electro osmosis: cathodic prot. currents causing, 161
Electrospark deposition of metal coatings, 201

ENERGY SOURCES
coal conversion env. simulation, 167
": gasification effluent analysis, 112
": MHD generator materials vs, 230

Ethane analyses, 112
Ethylene glycol: Al vs, 513

F

FABRICATION
cold work: 304 effects on sensitization, 356
" ": 304 vs acidic chloride sol, 565
" ": 304 SCC, infl H +, 47
" ": glassy CrNiPBFe, crevice attack infl, 362
welding: 304L, 5% delta ferrite pitting tests, 246
": scanning probe impedance analysis of surfaces, 269
": sensitization of austenitic CrNi steels, 686

FATIGUE
CrNi austenitic steel welds' tests vs 288 C HPW, 686
steel stressed in sea water, 107
stress vs 304 in acid, NaOH, 633

Ferralium 255, 468

FILMS AND SCALES
304 vs 290 C water + NaCl, characteristics, 85
": HPW + or - NaCl, Na sulfate vs, 653
": SCC in LiCl, infl of rupture, 279
Al5.5Zn2.5Mg, infl heat treat. on oxidation, 275
amorphous Cr alloys, passive in HCl, 679
anodic films on Bi in phosphoric acid, 220
brass in Cu sulfate, 225
carbonate on Fe, 416
CuBe infl on SCC, 262
CuNi vs aerated sea water, infl of velocities, 73
glassy metal alloys' films vs crevice attack, 367
Hf analysis, 284
hydrophobic film identification, 323
iron-4.54 Cu alloy vs 1000 C oxygen, 119
J 409 vs sodium sulfate, 94
passive Inconel 600, Incoloy 800 composition, 334
steel, C, infl of pH, cyclic stress, 665
Ti in bromides, 145

FRACTOGRAPHY
314 vs 290 C water, 409
CrMoFe amorphous alloys, 577
cold worked 304 vs acidic chlorides, 565
corrosion product effects, 443
pipeline steels vs H(2)S, 625
steels' cracking in HPW, 297
SCC, load pulsing for interpretation, 380

Fracture: 304 in hot HPW, mode of, 653

G

GALVANIC EFFECTS
304-lead in acidified NaCl sol., 183
NiCo vs C steel, 29
C steel-Hast. C in NaCl-acetic acid, 24
C steel vs MP-35N in NaCl acetic acid, 29

GAS, COMBUSTION
540-1060 C vs boiler tube steels, 369
coal: metals vs over 750 C, 230
equilibria calculations, 112

Gas, natural: steels, hi str. vs., 251
Geometry: M in S inclusions, effect on pipeline steel cracking, 625
Geometry: M in S inclusions, infl on H penetration of steel, 537
Geothermal brine: vs metals and alloys, 130
Glassy CrNiPBFe alloys, crevice tests, 362

GRAIN EFFECTS
304 cold work vs SCC in chlorides, 565
304 cooling rate, 395
26Cr-1Mo dropping of grains in ferric sulfate-50% sulfuric acid, 215
alpha brass in Cu sulfate-ammonium, 225
carbides in 304, infl of P, S, 497
carbides, H precipitation at, 67
crevice attack, CrNi alloys in 288 C HPW, 447
delta-ferrite pitting, infl Cr depletion, 246
general, 29
H at Al stressed vs NaCl, 241
H trapping in Cr steels, 53

288C high purity water: + oxygen vs 304, 304L, 299
" " ": + sodium chloride, nitrate, phosphate, sulfate, vs CrNi alloys and steels, 447
" " ": welded CrNi steels, fatigue tests vs, 686
290C high purity water: 304 vs, 409, 638
290C water + NaCl vs 304, 85
300C: reference electrode for phosphate sol. at, 510
315C: 10% NaOH vs Inconel 600, 9
450-750C and over, metals vs coal gas, 230
500C: H(2) vs 304, 67
540-1060C combustion gas + HCl vs boiler tube steels, 369
600-1000C Li vs 304L, 140
1000C: 304 recrystallization at, 356
1000C: oxygen vs Fe4.54Cu, 119
304 SCC in LiCl, infl, 279
anode impressed current rise underground, 161
CrNi duplex steels vs NaCl + H(2)S infl of, 611
high: gases characterization at, 112
passivity 12Cr steel, infl of, 94
sea water vs depth, 423

Test accelerated: 304 steel vs Huey, oxalic acid, Strauss, 498
Tests accelerated: grease-wax coatings on steel vs sulfuric acid, 400

TEST EQUIPMENT
3-point bends in gases, 251
AC, 10kHz vs epoxy-polyamide coatings, 390
autoclave for hot water, 409
blisters in Al vs chlorides, 618
cyclic stress for Ci steel, 665
drop weight, constant extension rate, 558
electrode, reference 300C phosphate sol., 510
electrode, submersible, hi temp. brine, 130
expanding-contracting drop apparatus, 323
polarization resistance error analysis, 175
polarization: wire electrode, 158
potentiostat: computer anal. of data from, 41
scanning probe impedance for surface analysis, 269
SCC loading rate control, 597
water, hi temp., 156
water velocity vs Cu alloys, 649

TESTS, LABORATORY
301 SCC in acidified chlorides, 530
304, 631 vs 1-28 MPa, 500C H, 67
": 97C Na sulfate SCC, 558
": 100C acidified NaCl, vs, 183
": 290C HPW vs, 409
": cold work effects on sensitization, 565
": fatigue corrosion, 633
": IG attack, infl, P, S, 497
": sensitization 356, 395
": SCC, 47, 279
403: SCC in Na sulfate, slow strain rate, 604
316 crevices, surface effects, 126
abrasion, ultrasonic of dental alloy, 101
7039 SCC in NaCl, 241
": pitting in ethylene glycol sol., 513
": salt, sea waters, vs, 458
blister precursors to Al pitting, 618
chelate decompositon, 522
CrMo amorphous Fe alloys' H embrit., 577
CrNi austenitic steels, welded vs HPW, 686
CrNi alloys' passive films' composition, 334
Cr P + or - Ni, C, B amorphous alloys vs acids, 679
coal combustion gas, 230
coal conversion environment simulation, 167
coatings' electrical, 390
combustion gas + HCl vs boiler tube steels, 369
constant strain, C steel vs acidic sol., 36
Cu: 1.8-2Be 0.2Co min vs ammonia, 260
CuNi vs sea water, 73
crevice attack glassy CrNi P B alloys, 362
crevice tests in water, CrNi alloys vs H, 544
duplex CrNi steels vs pitting, 611
electrochemical: 316 SCC in ammonium sulfate + chlorides, 699
galvanized steel vs NaCl, 701
gas, hi temp characterization, 112
geothermal brine vs metals, 130
Hf oxide films, 284

hydrogen embrit. Hast. C-276, 24
": permeation via Mn sulfide inclusions, 537
": sulfide in NaCl sol. vs X-42, 52, 60 pipe, 625
": trapping infl in Cr steels, 53
Inconel 600, 304 vs hi purity water, 447
inhibitors vs acid attack on Fe, 178
inhibitor contact angle measurements, 323
ion scavenging from ethylene glycol, 587
iron: carbonate sol. vs, 416
": HCl, vs, 320
"-Cu vs 1000 C oxygen, 119
": passivity vs pitting, 487
J 409 films in Na sulfate, 94
kraft white liquor vs C steel, 385
laser surface melting CDA 614, 405
Li, liquid vs 304L, 140
metal coatings, surface alloying, 201
Mo alloy in Al, 212
Ni, Sn vs KOH + K carbonate, Br, I, 591
Nb vs HCl, 554
pitting: 304, 316 steels, 313
pitting: delta ferrite infl in 304L, 246
polarization: 304 in HPW, 653
": direction effects on results, 327
": sensitization degree eval, 565
potentiostatic: brass, bronze vs fresh water, 649
potentiostatic: scan rate effects, 468
scanning AC probe of surfaces, 269
sea water vs Al, 423
steel: cylic stress + chlorides 1-14 pH vs, 665
": sulfuric acid thiourea inhibition, vs, 493
": cyclic stress in sea water vs, 107
": hi purity water, vs, 289
steel carbon: alloying vs pitting, 348
" ": ammonium EDTA, vs, 323
" ": oxidized, 310C water, infl inhibitor vs, 308
steel, hi str vs synthetic lubricants, 517
stress corrosion cracking: 304 in HPW, 597
" " ": environment effects on mode, 183
" " ": In 600 vs 315C steam, 9
" " ": straining electrode, 61
" " ": steels hi strength vs H, 251
" " ": Ti alloys' mechanism, 373
" " ": welded 304, 304L in HPW, 299
sulfate reducing bacteria vs C steel, 550
Ti vs bromides, 145
Ti vs synthetic lubricants, 152
water, hi purity vs 304, 85
weathering steel corrosion products, 345

TEST TECHNIQUES
Auger of commercial 304 steels, 497
autoradiographic, H trapping in Cr steel, 53
corrosion product removal, 443
graphic prediction of sensitization, 104
load pulsing in SCC fractography interpretation, 380
polarization, time effects, 327
potentiostatic, scanning rate infl, 468, 487
SCC, controlled for Inconel 600, 382
ultrasonic abrasion, 101
Test, on site: inhibitors in grease, was coatings, 482
Tests, on site: mass transfer, BWR, 1

TEST SPECIMENS
C-ring galvanic, 29
orientation effects on results, 41
orientation infl on SCC, 241
thickness intl on cylic stress results, 107

TIME
AlZnMg, infl storage on oxidation, 275
CuNi vs sea water, infl of, 73
galvanized steel, infl on NaCl attack, 701
load pulsing in SCC analysis, 380
Nb vs HCl, infl of, 554
polarization tests, effects of, 327
Tin: KOH, potassium carbonate + Br, I vs, 591
Tin/nickel alloy vs potassium alkali sol., 591

TITANIUM AND ALLOYS
50 A (ASTM B265 Cr 2) geothermal brines vs, 130
cathodic metal surface alloying, 201
code 12 geothermal brine vs, 130
204-410C perfluoropolyethers, vs, 152
bromide sol. vs, 145
fracture, mechanism of delayed, 373
SCC in NaCl, NaF, 373

Tritium: tagging of H trapping, 53

U–Z

Underground: anode, impressed current, temp. effects, 161
Underground: soil thermal conductivity, 161
Velocity: 0.1-3m/sec: fresh water vs Cu alloys, 649
Velocity: 3-5 m/sec sea water vs CuNi, 73
Water, fresh: brass, bronze vs 0.1-3 m/sec, 649
Water, general: AlZnMg, infl on oxidation, 275
Water, general CuBe SCC in ammonia, infl of, 260

WATER, HIGH PURITY
288C: crevice tests of 304L, alloy 600, Pt, 544
288C + oxygen vs 304, 304L, 299
290C: 304 vs 85, 409, 638
C, low alloy, CrNi steels vs, 289
CrNi steels austenitic: welds tests vs 288C, 686
Inconel 600, AISI 304, infl properties on crevice attack, 447
mass transfer in, 1
sodium chloride, sulfate + or - vs 304, 653

Water, hi temperature: test equip, 156
Water, salt: less than 20 g/sq dm dissolved solids vs metals, 130

WATER, SEA
1018 steel cyclic stress in, 107
aerated, sulfide polluted vs CuNi, 73
+ carbon dioxide Al Vs, 458
properties vs depth, 423

Wax coatings, 482
Welding: see fabrication
Zinc and alloys: powder scavenging of Cu, Fe ions in ethylene glycol, 587
